PROFILE SUMMARY

Computer Science undergraduate with strong Python skills and hands-on experience building Generative AI applications using LLMs, RAG, LangChain, ChromaDB, and Streamlit. Skilled in developing AI chatbots, intelligent document retrieval systems, and end-to-end AI workflows with prompt engineering and API integration. Passionate about designing scalable AI solutions using modern LLM architectures and agentic AI. Focused on solving real-world business problems through practical AI systems.

TECHNICAL SKILLS

- **Languages:** Python, SQL
- **Generative AI:** Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, AI Agents, LangChain, LlamaIndex, OpenAI API (Google Gemini API)
- **Vector Databases:** ChromaDB, FAISS
- **Data & Visualization:** NumPy, Pandas, Matplotlib, Seaborn, EDA
- **Tools & Platforms:** Streamlit, GitHub, MySQL, VSCode

PROJECTS

AI Website RAG Chatbot | Python | LangChain | ChromaDB | Streamlit | LLM | RAG [MAY 2026 – JUNE 2026]

- Built a RAG chatbot that scrapes any website and answers questions using only that site's content, eliminating AI hallucination for domain-specific queries.
- Used TF-IDF trigram vectors with cosine similarity retrieval and Groq LLaMA-3.3-70B for streaming answers, with a 3-tier scraper handling JS-protected sites via Playwright.
- Achieved sub-1-second retrieval across 500+ chunks with per-URL vector isolation, SQLite chat history, conversational memory, and PDF export of Q&A sessions.

AI-Powered Dataset Profiling Assistant | Python | LangChain | ChromaDB | LLM | RAG [JAN 2026 – APRIL 2026]

- Built an AI-powered data profiling tool that lets users explore and query CSV datasets in plain English, eliminating the need for manual SQL or coding to uncover insights.
- Architected a LangGraph-based multi-agent pipeline with RAG (ChromaDB + Sentence Transformers) and Gemini 2.5 Flash to classify user intent and route queries across statistical analysis, visualization, and report-generation tools, enabling context-aware, source-cited answers with follow-up handling.
- Delivered an interactive Streamlit dashboard with dynamic Plotly visualizations and automated PDF report generation, reducing manual EDA (exploratory data analysis) time from hours to minutes.

AI-Based Software Project Estimation Manager | Python | Scikit-learn | LLM | RAG [SEP 2025 – DEC 2025]

- Built an AI-powered project estimation tool using Groq's LLaMA 3.3 70B that generates itemized software quotes from a plain-English description, eliminating manual scoping for IT consultants.
- Architected a structured LLM pipeline outputting phase-wise JSON estimates, enabling deterministic slider-based negotiation (cost, timeline, team, complexity) with programmatic recalculation, avoiding hallucinated numbers. .

EXPERIENCE

Python Programming Intern | ARTIFAI TECH [JUNE 2025 – JULY 2025]

- Developed Python applications and automation solutions for business use cases.
- Enhanced problem-solving and debugging skills through collaborative development.

EDUCATION

B.E Computer Science and Engineering | Sri Shakthi Institute of Engineering and Technology [2023 – 2027]

- CGPA: 8.7 / 10

Higher Secondary | Prince Srivari Senior Secondary School, Chennai [2022 – 2023]

- 85.4%

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL – Data Science using Python (Score: **82%**)
- Introduction to Modern AI – CISCO Networking Academy
- Participated in the MIT Hackathon, developing an AI-powered enterprise solution while strengthening teamwork, project planning, and time management skills.
